Rio Kandekore

Age: 23

Gender: Male

Location: Manchester

Occupation: Consultant

Rio works long hours in a high-pressure consulting role. He trains 4–5 times per week, mixing strength training and endurance sessions. He is focused on improving performance, not just aesthetics. Due to his demanding schedule, he values data that helps him optimise recovery, sleep, and training intensity. He sees health as an investment in his productivity and career longevity.

WHOOP®

EXPECTATION

Rio expects WHOOP to provide detailed and accurate performance insights, particularly around recovery, strain, and sleep tracking. He wants real-time data that helps him adjust his training load without overtraining.

The device must be comfortable to wear continuously and have a long battery life to support his routine. He expects clear metrics that help him make smarter decisions about rest and performance.

PSYCHOGRAPHICS

Rio is highly ambitious and competitive with himself. He sets measurable goals in both his career and fitness life. He values efficiency and prefers tools that give actionable insights rather than general advice. He is data-driven and comfortable using technology to improve his performance. He is motivated by progress and long-term optimisation.

EMOTION

Rio feels more confident when he can see measurable improvement. Tracking recovery and strain reduces anxiety about burnout and overtraining. The product gives him reassurance that he is balancing performance with wellbeing. Seeing data trends over time gives him a sense of control and achievement.

Media Consumption

UNANSWERED QUESTIONS

- Is the subscription worth the long-term cost?
- How accurate is the recovery data compared to competitors?
- Will it genuinely improve performance or just provide more data?
- Is continuous tracking necessary for someone with a busy career?
